

Recycled Parts Services 2.0 Features and Benefits

With Recycled Parts Services 2.0 appraisers will have the ability to view parts from more suppliers.

And, insurance companies will have increased visibility and control over which recycled suppliers their appraisers are using and increased reporting capabilities via the CCC Portal. The CCC Pathways® user does not need to make any changes to the CCC Pathways unit in order to use Recycled Parts Services 2.0.

- _ Recycled Parts Services 2.0 provides the continued capability to accept recycled parts on a nightly basis from multiple vendor sources
- _ The Insurance Company can view the supplier lists from its staff, DRP shops, and/or independent appraisers via the CCC Portal (The Appraiser's preferred list)
- _ The Insurance Company can view available recycled parts at both a summary and detail level by estimate for audit/reinspection purposes via the CCC Portal
- _ An appraiser is now able to view recycled parts from up to 20 suppliers. The new maximum will be 20 suppliers
- _ The Insurance Company can identify mandatory suppliers for its appraisers via the CCC Portal
- _ The Insurance Company can create Operational Reports on an as-needed basis. These reports can detail the number of requests with recycled parts found, the number of recycled parts found, and the number of requests in which no recycled parts were returned.
